PROFILE

I am a developer who knows the importance of being flexible. The new way today can be the old way tomorrow, so I try to never get stuck in my ways. I am committed to learning, have a responsibility to the user, and a passion for problem solving.

RED 5 STUDIOS

Senior Web Designer, January 2015 — Present

Responsible for designing and developing marketing websites for the sci-fi MMO FireFall. Being the sole member in the web branch of the Live Team, I am responsible for all parts of the typical web process. From the planning, which includes the development of site hierarchy and page organization. To design, which includes creating functional wire frames and coded mock-ups. To finally Development, which includes adding functionality and coding web pages to work across many devices and browsers.

MIND OVER MEDIA

Senior Digital Engineer, June 2006 — January 2015

On the Mind Over Media Digital Team, I am responsible for developing and implementing interactive projects using multiple languages and technologies. Primarily front-end development using Javascript, HTML, and CSS, but also back-end development using PHP, ASP.net, and SQL.

Previously responsible for developing interactive projects using Actionscript 3 with the Adobe Flash Platform.

THE ABREON GROUP

Flash Developer, May 2006 — September 2006

Responsible for programming and animating interactive corporate learning applications.
